

KCIC Web Services Export Connector

KCIC Web Services Export Connector

Kofax Capture Import Connector Web Services Export Connector

KCIC Web Services (formerly Ascent Collection Server (ACS)), provides a secure way to connect a scan client application such as Kofax Express to Kofax Capture. This CaptureBites™ connector does exactly that. Kofax Express index fields can easily be mapped with Kofax Capture index fields after selecting the matching batch class and document class.

This is the setup of the CaptureBites KCIC Web Services connector :

Export to Kofax Capture Import Connector - 2.5(0) - Setup - Demonstration mode

Server

URL:

Connect as: Current Windows user Specific user: User name: Password:

Batch

Class name:

Document class name:

Form type name: From document class:
 From Kofax Express index field:

Index Fields:

Kofax Capture	Kofax Express
name	Name
id	
city	
title	
Name	
size	

After Export:

Wait until import is completed Let Express continue

Check every: seconds

KCIC Web Services Export Connector

Combine this Connector with CaptureBites MetaTool for Advanced Index Extraction and More

Use this connector in combination with CaptureBites MetaTool for advanced index extraction, keyword document separation, floating data extraction, multi-field and drill down database lookup and other advanced functionality.

To learn more about MetaTool, press any of the feature buttons below :

The MetaTool presents itself as a standard Kofax Express export connector and passes through extracted data and processed images to an export destination of choice such as Email, Folder Structure, FTP Server, Database, MS SharePoint Server & Online, Alfresco, OpenText Content Server, Xerox DocuShare, ViewBites or other DMS systems.
